

SIR ROBIN & THE LONGBOWMEN (Burger Records/GER)

Sir Robin & The Longbowmen's second full length album "Prozacco" follows in the steps of their self titled debut LP but reflects the ongoing progress and development of the band's very own sound.

Quiet and delicate, yet boisterous and pushing, variety has become their trademark that runs through the record like a common thread.

The successor symbolizes the continuous search for new influences on the purview of numerous musical styles that are combined to a varied work of Neo Psychedelia.

Since 2019 they are part of the US-label Burger Records that have been releasing „Prozacco“ on tape in March 2019 as well.

PRESS

SIR ROBIN & THE LONGBOWMEN (2016)

*...“This album is as much a journey into the hazy past of psychedelic music as it is into the future of modern adventurous neo-psych...and they bring it all to fruition without pretense or a sense of overbearing, leaving the songs to sound ethereal and breezy; one where walls breathe, and trees dance in the moonlight.”... **It's Psychedelic Baby Magazine (SLO)***

*...“This Dresden based seven piece is a fantastic piece of big production psychedelia with traces of baroque pop, contemporary indie and vintage progressive rock coalescing to form a very diverse, but distinctive whole.”... **The Active Listener (NZ)***

*...“Great melodies played and supported by super talented musicians, superb vocals that strongly remind us of the one and only Jim Morrison, and the insuperable magic of Eric Burdon.”... **Music From The Basement (GR)***

*...“Das freundliche Murmeltier vom Coverartwork reicht als spiritueller Seelenpartner für den Trip, den die LONGBOWMEN auf einer guten Dreiviertelstunde bieten, die Pfote, und mit ihm als Begleiter bleibt das Album eine so spannende wie anregende Erfahrung.”... **OxFanzine (GER)***
