

# OGROM CIRCUS

## the world barely makes a sound (vinyl LP/digital)

After a few single releases, the full album *"the world barely makes a sound"* is now available on vinyl and all streaming platforms. Just like the singles, all tracks were recorded live to an old Tascam multi-track tape machine during two studio live session in 2023 and 2024.

The songs were written by Hannes Fröhlich and later arranged together with the full band. After playing music in different constellations for over ten years, the group has developed a natural way of working together — something that shaped the feel of the live recordings. The tape recording gives the album a warm, slightly rough sound that matches the atmosphere of the songs.

„Energetic rhythms, polyphonic vocals and massive organ sounds gonna revive the psychedelic of the sixties in a modern pop-robe.“

hannes fröhlich — vocals, guitar  
maxim richter — guitar, backings  
wenzel fröhlich — drums, backings  
cornelius hütter — bass, backings  
florian wenzel — organ, synth
