

OGROM CIRCUS - What the sea once took (LP)

Heartbreaking vocals harmonies, soulful atmospheric folk and some psychedelic space trips ... with a bluesy breeze of soul.

After some changes in the line up, the quintet fires up any audience again since 2018. Energetic rhythms, polyphonic vocals and massive organ sounds gonna revive the psychedelic of the sixties in a modern pop-robe.

The band released their debut at Timezone Records in 2014. The second album was released in april 2019 in cooperation with Dynamite Platten. The LP was recorded and mastered by musician and producer Rhys Braddock (NZL).

"Hidden psychedelic jewel from Germany [...] Amazing young musicians with old souls created an emotional and really powerful album [...] Pretty tasty, definitely worth having!" - Fair Price Music

„This is conjuring a satisfied smile in the face!“ - Concerto Vienna
